## Personal Intamation

- I'm very passionate about building a complete web study and I started a phase of myself starting to teach the web from youtube and helping me tweak the macromedia we used to build with some, I found the php and started to apply it created more than the site of its I started studying laravel but it was not easy I participated in more than two years of the php site Al-Sanadi took first place in a project whose idea was distance learning It can be a simple start but a big need is a big start
